

How does a real-asset deal get from a data room to professional investors?

The asset is rarely where a deal stalls. It stalls between a financing need and an investor-ready listing, while entity checks, listing route, documents and subscription run through separate advisers. On marketplace.stegx.finance sponsors list a defined deal, and professional investors register, complete KYC, subscribe and pay.

M1 KYB and KYC Sponsor entities and beneficial owners identified and checked.	M2 Asset and listing route Asset, cash flows, financing need and the route to listing.	M3 Listing outline Built only from facts you can evidence. Full material at launch.	M4 Project Framework Route, providers and their regulatory roles, launch and annual running costs, timeline.
---	--	---	--

ONBOARDING FEE Fixed Set in the proposal before work starts	PAYMENT Invoiced on signature of the StegX Advisory Agreement, payable within 10 business days; work starts on receipt.	SCOPE Reduced scope for finished products on request.
	THIRD PARTIES Passed on at cost, without a StegX markup.	LAUNCH Implementation, volume and annual servicing fees; rates in the proposal and a separate launch mandate.

LIMIT StegX provides the process and the marketplace. It does not guarantee capital, subscriptions or liquidity, and access for investors depends on eligibility and investor onboarding.
